

PreCalculus Review Lesson & Assignment 6

Wednesday 4/1 (A) & Thursday 4/2 (B)

Review Lesson:

Open the Day 6 Review Lesson. This lesson reviews all of our Unit 1 on GRAPHS. There are 8 problems. Work through them to the best of your ability, asking questions along the way if you have them. (Just send me an email.) When you feel good about your work, open the KEY posted on the Day 6 page to check your answers. Again, if you have any questions, just ask.

Review Assignment:

Your review assignment is on Pearson and is 8 questions as well, VERY similar to the review lesson practice. It is set up as a homework, so you have a few attempts within each question. Please don't exhaust all of your attempts before you ask me for help!

Use www.desmos.com OR the TI-84 at <https://education.ti.com/en/software/update/free-ti-software-license-student> for your graphing needs.

This lesson assignment is due **Sunday, April 5th by 11:59 PM.**

I will **not** be granting any extensions here. I would encourage you to get it done by Friday, April 3rd so you don't have any weekend work for my class.
